ELSEVIER International Journal of Mass Spectrometry and Ion Processes 144 (1995) 207–209

Subject Index

Axial modulation
Systematic factors affecting high mass-resolution and accurate mass assignment in a quadrupole ion trap 87

Bond dissociation energy
Charge stripping of ligated metal ions 67

Carbon dioxide
The dissociative electroionization of carbon dioxide by low-energy electron impact. The C^+, O^+ and CO^+ dissociation channels 105
Carbon ion reactions
Mass-dependent dynamics of the luminescent exchange reactions $C^+(^2P)$, $P^+(^3P) + H_2$, D_2, HD 167
Charge stripping
Charge stripping of ligated metal ions 67
Charge-transfer complex
Low energy acetoin ions $CH_3C(=O)C(H)(OH)CH_3^{\cdot+}$ decompose to $CH_3CO^{\cdot}$ and CH_3CHOH^+ via a remarkable "hidden rearrangement" L1
Chemiluminescence
Mass-dependent dynamics of the luminescent exchange reactions $C^+(^2P)$, $P^+(^3P) + H_2$, D_2, HD 167
Chromium clusters
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23
Chromium valency
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23
Cluster fragmentation
Neutral fragment production induced by collision of 60-keV u^{-1}-H_{25}^+ clusters with helium 79
Clusters
A semi-empirical method to calculate cross-sections for the electron-impact ionization of clusters L9
Coulombic explosion
Neutral fragment production induced by collision of 60-keV u^{-1}-H_{25}^+ clusters with helium 79
Covariance mapping
Covariance mapping of charged species evolution in $YBa_2Cu_3O_{7-\delta}$ laser ablation 1
Cross-section
Dissociative electron attachment to SF_6: production of SF_5^- at temperatures below 300 K L13
Cross-sections
A semi-empirical method to calculate cross-sections for the electron-impact ionization of clusters L9
Crossed-beams apparatus
Dissociative electron attachment to SF_6: production of SF_5^- at temperatures below 300 K L13

Density functional theory
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23
Dications
Charge stripping of ligated metal ions 67
Difference measurements
Difference measurements and shaped waveforms applied to Hadamard transform FT/ICR 139
Dissociation
Dissociative electron attachment to SF_6: production of SF_5^- at temperatures below 300 K L13
The dissociative electroionization of carbon dioxide by low-energy electron impact. The C^+, O^+ and CO^+ dissociation channels 105
Double hydrogen rearrangement
Metastable McLafferty rearrangement reaction in the electron impact ionization of stearic acid methyl ester 199
Double hydrogen transfer
Low energy acetoin ions $CH_3C(=O)C(H)(OH)CH_3^{\cdot+}$ decompose to $CH_3CO^{\cdot}$ and CH_3CHOH^+ via a remarkable "hidden rearrangement" L1

Electron attachment
Dissociative electron attachment to SF_6: production of SF_5^- at temperatures below 300 K L13
Electron impact
The dissociative electroionization of carbon dioxide by low-energy electron impact. The C^+, O^+ and CO^+ dissociation channels 105
Electron impact ionization
Metastable McLafferty rearrangement reaction in the electron impact ionization of stearic acid methyl ester 199
Electron-impact ionization
A semi-empirical method to calculate cross-sections for the electron-impact ionization of clusters L9

Fourier transform ion cyclotron resonance mass spectrometry
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23
Fragmentation phenomena
Neutral fragment production induced by collision of 60-keV u^{-1}-H_{25}^+ clusters with helium 79
FT/ICR
Difference measurements and shaped waveforms applied to Hadamard transform FT/ICR 139

Hadamard transform
Difference measurements and shaped waveforms applied to Hadamard transform FT/ICR 139
High mass-resolution
Systematic factors affecting high mass-resolution and accurate mass assignment in a quadrupole ion trap 87
High resolution
Mass shifts and local space charge effects observed in the quadrupole ion trap at higher resolution 47
High-energy cluster collision
Neutral fragment production induced by collision of 60-keV u^{-1}-H_{25}^+ clusters with helium 79
Hydration
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23

Ion trap
Mass shifts and local space charge effects observed in the quadrupole ion trap at higher resolution 47
Ion/molecule reactions
Mass-dependent dynamics of the luminescent exchange reactions $C^+(^2P)$, $P^+(^3P) + H_2$, D_2, HD 167
Ionic hydrogen clusters
Neutral fragment production induced by collision of 60-keV u^{-1}-H_{25}^+ clusters with helium 79
Ionization
The dissociative electroionization of carbon dioxide by low-energy electron impact. The C^+, O^+ and CO^+ dissociation channels 105
Isotope effect
Mass-dependent dynamics of the luminescent exchange reactions $C^+(^2P)$, $P^+(^3P) + H_2$, D_2, HD 167

α-Ketol ions
Low energy acetoin ions $CH_3C(=O)C(H)(OH)CH_3^{\cdot+}$ decompose to $CH_3CO^{\cdot}$ and CH_3CHOH^+ via a remarkable "hidden rearrangement" L1
Kinetic energy
The dissociative electroionization of carbon dioxide by low-energy electron impact. The C^+, O^+ and CO^+ dissociation channels 105

Laser ablation
Covariance mapping of charged species evolution in $YBa_2Cu_3O_{7-\delta}$ laser ablation 1
Laser desorption–ionization
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23

Mass accuracy
Mass shifts and local space charge effects observed in the quadrupole ion trap at higher resolution 47
Mass scanning rate
Systematic factors affecting high mass-resolution and accurate mass assignment in a quadrupole ion trap 87
Mass spectrometry
Difference measurements and shaped waveforms applied to Hadamard transform FT/ICR 139
Matrix-assisted laser desorption
Matrix-assisted laser desorption ionisation time-of-flight mass spectrometry of synthetic polyesters 131
McLafferty rearrangement
Metastable McLafferty rearrangement reaction in the electron impact ionization of stearic acid methyl ester 199
Metal hydroxides
Charge stripping of ligated metal ions 67
Metastable peak
Metastable McLafferty rearrangement reaction in the electron impact ionization of stearic acid methyl ester 199

Multi-ionization process
Neutral fragment production induced by collision of 60-keV u^{-1}-H_{25}^{+} clusters with helium 79

Peptides
Mass shifts and local space charge effects observed in the quadrupole ion trap at higher resolution 47
Phase-locking
Systematic factors affecting high mass-resolution and accurate mass assignment in a quadrupole ion trap 87
Phosphorus ion reactions
Mass-dependent dynamics of the luminescent exchange reactions $C^{+}(^{2}P)$, $P^{+}(^{3}P) + H_2$, D_2, HD 167
Polymers
Matrix-assisted laser desorption ionisation time-of-flight mass spectrometry of synthetic polyesters 131

Quadrupole ion trap
Systematic factors affecting high mass-resolution and accurate mass assignment in a quadrupole ion trap 87

Shaped waveforms
Difference measurements and shaped waveforms applied to Hadamard transform FT/ICR 139
SF_6
Dissociative electron attachment to SF_6: production of SF_5^- at temperatures below 300 K L13
Space charge
Mass shifts and local space charge effects observed in the quadrupole ion trap at higher resolution 47
Stearic acid methyl ester
Metastable McLafferty rearrangement reaction in the electron impact ionization of stearic acid methyl ester 199

Theoretical
A semi-empirical method to calculate cross-sections for the electron-impact ionization of clusters L9
Time of flight
Covariance mapping of charged species evolution in $YBa_2Cu_3O_{7-\delta}$ laser ablation 1
Study of the mechanism of chromium cluster formation by laser microprobe mass spectrometry. Correlation with theoretical computations 23
TOF mass spectrometry
Matrix-assisted laser desorption ionisation time-of-flight mass spectrometry of synthetic polyesters 131
